

East Kilbride & District Engineering Group Training Association Ltd

Course Outline

<i>Course Classification</i>	Technical Skills	<i>Course ID</i>
<i>Course Title</i>	Engineering Design using AutoCAD	
<i>Duration</i>	32 Weeks	<i>Certification</i> City & Guilds
<i>Course Publisher</i>	East Kilbride & District Engineering Group Training Association Ltd	
<i>Start Date</i>	Please contact us to arrange dates	<i>Hours</i> 30 hours / week
<i>Price</i>	Price On Application	

Objectives

To provide a course of study that will enable the participant to achieve recognized vocational qualifications and develop competence in AutoCAD and Performing Engineering Operations. On completion of the course candidates will be able to:

1. Produce Engineering drawings in 2D and 3D.
2. Work safely in an engineering environment
3. Develop yourself and work with other people on engineering activities
4. Use and communicate technical information
5. Apply quality control in engineering
6. Machine engineering materials by Turning & Milling
7. Use and Program CNC machines

Requirements

Candidates should have experience of engineering activities, be computer literate and demonstrate a good academic background. A command of written and spoken English is essential.

Notes

On successful completion of the course candidates will receive City & Guilds VQ Certificates in Computer Aided Design (Level 3) and Performing Engineering Operations (Level 2). This course was designed for a specific customer requirement. All courses can be modified to include other modules i.e. Quality Management and Health and safety.
